

Dear Sirs

The succeeding page contains order form for programs from NetSystem package in InstalSoft full version. The full version means that the program does not have any limitations in the scope of products' databases used during design process. All databases are available that have been developed by InstalSoft for a given software.

It is possible to purchase a licence without time limit at once or at the beginning a 1 year licence with an option of its later extension to the licence without time limit. The 1 year licence costs about 60% of the price of the licence without time limit and its extension to the licence without time limit costs another 50% of the initial price. As a result it is possible by paying 10% higher price to purchase a program in two instalments paid in 1 year interval.

IMPORTANT! Please remember that the licence extension is possible only during its validity, i.e. within 1 year from the purchase date.

The following programs are currently offered in scope of NetSystem package:

Net-san 4 Graphical design of outdoor water supply systems and sewage systems. Complete set of available databases of pipes and manholes. Licence for one work station. Documentation in electronic form.
Scan combine Combining scanned parts of a bigger drawing into one file and processing scans. Program is a free supplement to each package configuration. Documentation in electronic form.
Package manager Managing activation and update of programs from the package and project files. Program is a free supplement to each package configuration. Documentation in electronic form.
Instal-mat Editing and pricing material lists and preparing orders based on project data files of the designing software. Complete set of available databases of materials and prices. Program is a free supplement to each package configuration. Licence for many work stations. Documentation in electronic form.
